# November Newsletter & Calendar

This November, our **Busy Bees Classroom** will be buzzing with fun, creativity, and hands-on learning! Throughout the month, our little learners will focus on the letter **Bb**, number **1**, color **brown**, and shape **star**. Children will explore these concepts through painting, coloring, crafts, and interactive activities that help develop their fine motor skills, creativity, letter recognition, and early math skills. Some of our exciting activities include making bumblebees, bears, bunnies, and turkeys, creating colorful collages, and exploring objects that begin with the letter B. As we prepare for Thanksgiving, we will also introduce the importance of kindness, sharing, and being thankful for the people and things around us.

## How Families Can Support Learning at Home

Families can help reinforce what we are learning in the classroom through simple, fun activities at home. Encourage your child to look for **brown objects**, such as teddy bears, shoes, or leaves, and practice identifying the **letter B** in books, signs, and everyday items. Help your child practice counting by finding **one object** at a time and pointing out **star shapes** in books, decorations, or toys. You can also practice the letter B sound by naming familiar words like *ball, baby, bear,* and *banana*. Allow your child to strengthen their fine motor skills by coloring, tearing paper, gluing, and creating simple crafts.

**Important Dates to Remember**

- **November 11:** Center closed for Veterans Day.
- **November 24:** Thanksgiving lunch with students.
- **November 25:** Early dismissal at 12:00 PM.
- **November 26–27:** Center closed for Thanksgiving break.

**Classroom Supply Reminder:** Families are asked to provide construction paper and tissue paper to support our classroom activities throughout the year.
